

THE ONLY OTHER WAY TO GET AN LPG CONVERSION AS GOOD AS THIS SEDAN...

...IS TO GET THIS WAGON. LPG CONVERSION FROM FORD.

Available as an option on Falcon GLi
sedan and wagon, Futura sedan and wagon,
Fairmont sedan and wagon.

If you like the idea of LPG economy but have been a little unsure about vehicle conversion, Ford has the perfect answer: LPG fitted by Tickford Vehicle Engineering and now available as an option on Falcon automatic sedans and wagons.

This LPG option was jointly developed by Ford and TVE. It's a

system born of the latest computer technology. In the sedans, the system is boot-mounted. In the wagons, a unique triple cylinder installation is mounted in the spare wheel well. (The spare wheel is vertically mounted in the wagon load area, complete with carpeted cover and occupying minimal load space.)

LPG tank lines are located to help avoid damage from loose luggage.

The under floor wagon fitment does not affect petrol tank capacity.

Both systems are designed to comply with Australian Design Rules.

The advanced design technology offers several advantages over other LPG conversions:

- Fast, reliable “intelligent” starting system helps to provide fast start-ups using petrol injection, even when LPG selected.
- Fuel changeover switch is fully integrated into the dash, not simply “added on”.
- Fuel gauge automatically displays

petrol and LPG capacities as each system is selected.

- Boot mounted LPG tank and lines are steel plated.
- LPG system maintenance is carried out at normal Ford service intervals by Authorised Ford Dealers.
- Extensively safety tested to Ford's world engineering standards.

- On wagons, the neat under floor triple LPG cylinder fitment is achieved without reducing the petrol tank capacity. The LPG installation provides 60 litres of LPG. On all Falcons, the LPG fuel filler is located in the same area as the petrol filler.
- A TVE LPG system is more environmentally friendly. Compared to engines

that run on petrol, a TVE LPG system may reduce the output of the three main exhaust gases by as much as 70%.

Because of the fully integrated nature of the TVE LPG system, complete compatibility with Falcon's standard *Smartlock* security system is achieved. And every new LPG-equipped Falcon is given the security

of the Ford 24 month / 50,000 km Express New Vehicle Warranty.

If you've been thinking LPG, Australia's most advanced solution is at your Ford Dealer now.

HAVE YOU DRIVEN A FORD...LATELY?

This brochure is designed to provide you with a general introduction to the Ford Products (including available optional equipment) referred to, and should be read in conjunction with the latest specification sheet. Because of changes in conditions and circumstances Ford® reserves the right, subject to all applicable laws, at any time, at its discretion, and without notice, to discontinue or change the features, designs, materials, colours and other specifications and the prices of its products, and to either permanently or temporarily withdraw any such products from the market without incurring any liability to any prospective purchaser or purchaser. The latest specification sheet should be referred to for information on the availability, ordering and use of optional equipment. Always consult an Authorised Ford Dealer for the latest information with respect to features, specifications, prices, optional equipment and availability before deciding to place an order. *FORD MOTOR COMPANY OF AUSTRALIA LIMITED (A.C.N. 004 116 223) Registered Office: 1735 Sydney Road, Campbellfield, Victoria 3061, Australia. *Subject to State and Territory regulations.
